

How to Share with More Users

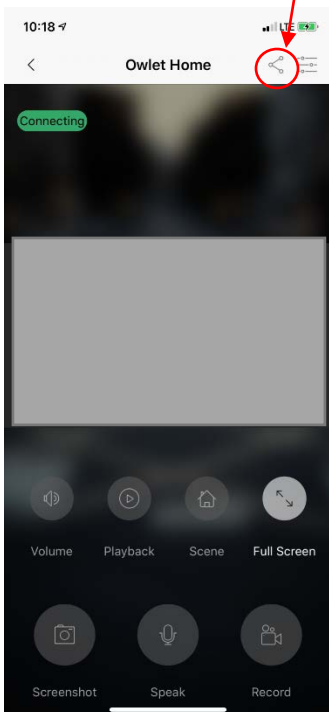

Here is the instruction to show you how to share with more Users for Owlet Home Video Doorbell.

Step 1: Open the ToSee APP

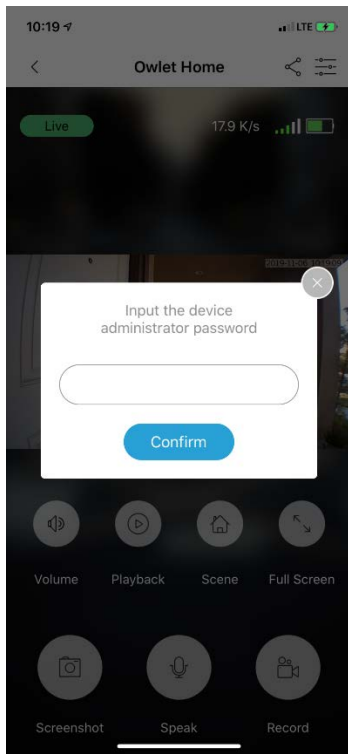

Step 2: Click it for Live View

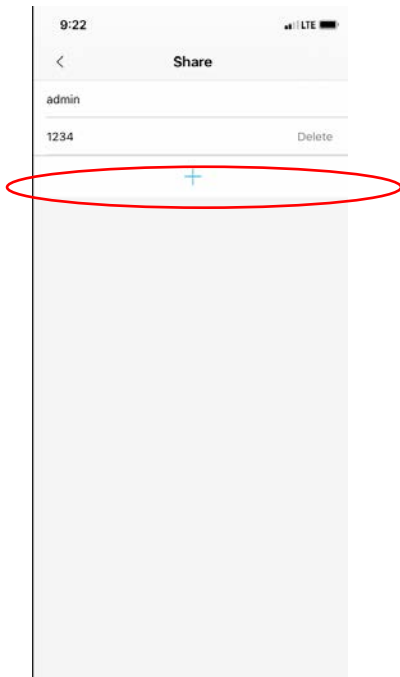

Step 3: Click the Share button on top right

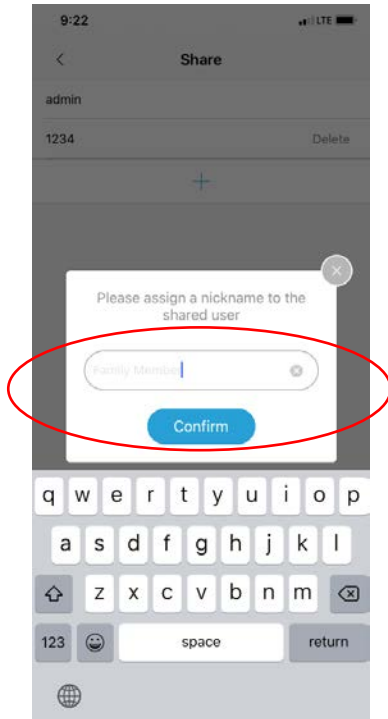

Step 4: Enter your admin password and click “Confirm”.

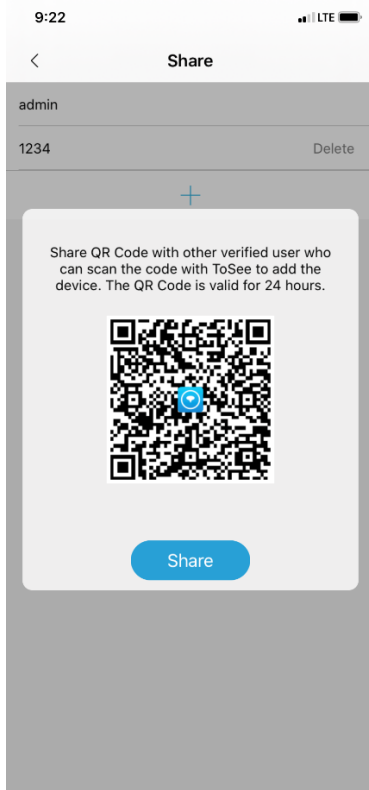

Step 5: Click “+” to create sharing

Step 6: Assign a nickname and click "Confirm".

Step 7: App generate a QR Code

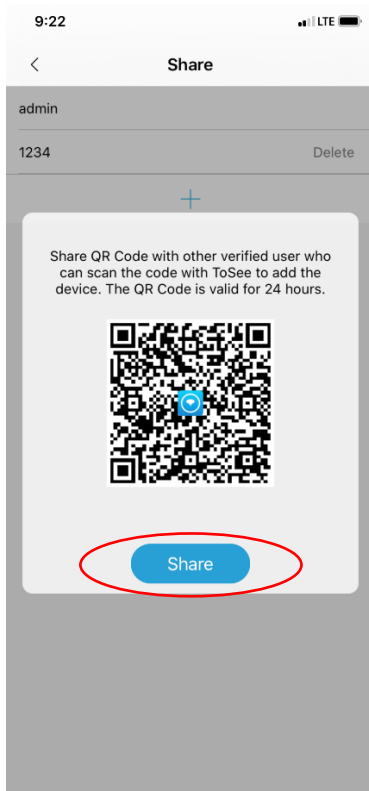

Step 8: You can do one of below steps to allow another user to add the device to his/her smart phone

8.1 Use other smart phone with ToSee App -> Launch ToSee App -> Click Scan QR Code -> Scan the QR Code above which generated by the ToSee App in first user smart phone. Then, the device will be added to the second users smart phone successfully

8.2 Or, the first user could click "Share", it will allow you to share this QR code via email or message to the second user. Then, the second user follow step 8.1 to scan the QR Code with ToSee App to add the device to the second user's ToSee App.

Step 9: Repeat above process to share the device with more users. You could share it with up to 4 users to do the LIVE VIEW at the same time, but only one can do intercom/audio at a time.
